- **05. STAKING**

# • 01. ABOUT BETGET

## • Redefining Meme Coins

**Our project predicts the price of tokens and earns profits**

**Solana First Price Prediction Game (P2E) Project.**

**We created this project in combination with Solana Smart Contract and Chainlink Oracle Feed.**

**Users can create a price prediction game by entering the contract address of the token in the Solana network.**

**A price prediction game is a game that predicts an increase or decrease in the price of a token in an hour. If you succeed in the prediction, you can get a prize pool of the game. These projects will interest large investors of several tokens. They can control the price and earn money from our prediction project. They are currently very interested in our project. The game's generation fee and game fee predict a structure in which the token's liquidity in the market decreases through the token's incineration, and the token's value continues to rise.**

# • **02. ROADMAP**

## **Q1 2024**

**develop DeBetCatGame's SmartContract  
launch Website & Community development  
Private Sale BetcatToken**

## **Q2 2024**

**Groth Marketing  
Launch BetCat's OpenBeta(V1)  
Public Presale BetCatToken  
Claim BetCat & DEX Exchange Listing**

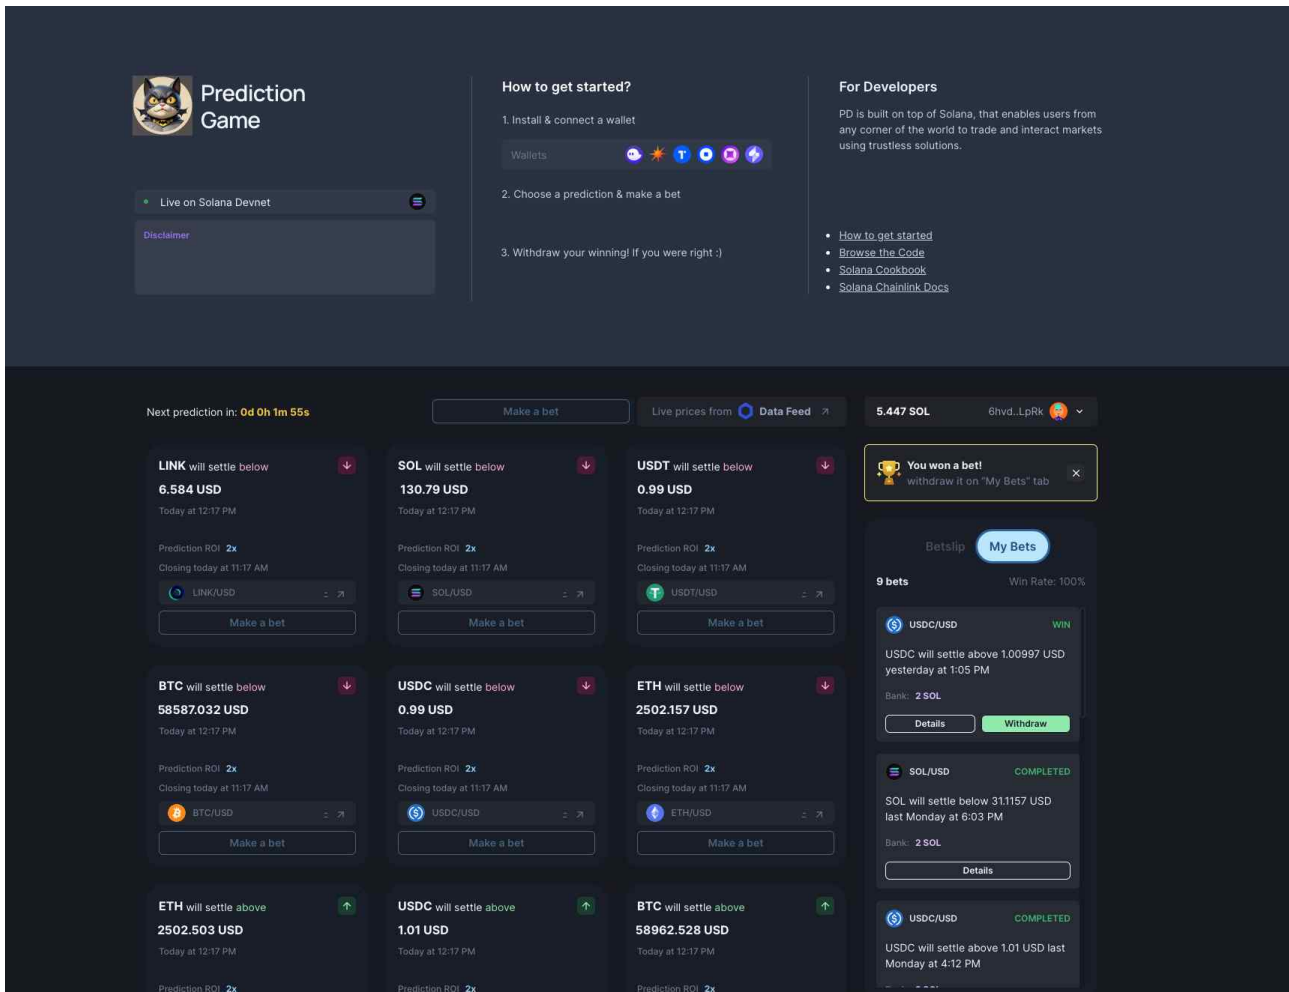

## **Q3 2024**

**Launch BetCat's Game(V2)  
CEX Exchange Listing  
Burn BetCat  
Rewards for holders & stakers**

## **Q4 2024**

**Launch BetCat's Game(V3)  
Web3 Quest Platform  
DEX&CEX: New Trading Venue  
Long-Term Sustainability and Innovation**

# • 03. DAPP

The above screen is the main screen of the game. Users can create a game by entering the contract address of the token.

Alternatively, you can join a game that has already been created.

The user predicts whether the price of the candle will rise or fall after one hour of UTC time.

If you succeed in predicting, you can get a BETCAT.

# • 03. DAPP

**All transactions are recorded in Solana network transactions, and the price of the token was implemented using Chainlink Oracle, which is used on all futures exchanges. The Chainlink Oracle feed can be used to predict the rise or fall of the base price to earn a profit.**

## • 04. TOKENOMICS

**Token Supply : 1,000,000,000**

**Private sale: 15%**

**Public PreSale : 35%**

**LIQ (DEX & CEX) : 20%**

**Marketing : 10%**

**Rewards for holders & stakers : 10%**

**Team: 10% [ Locked 1 Year]**

**No taxes, Contract ownership is renounced and Liquidity pool token is burnt forever.**

**Just laser focused Betcat moves to a Billion+ dollar market cap and to the moon!**

# • 05. STAKING

## **Staking Tokenomics: A Look Ahead**

- **Year 1: 12.5% Allocation (17,500,000 tokens)** • In its inaugural year, betcat rewards its early stakers with a
  - **significant allocation. By committing your tokens to the staking mechanism, you become an integral part of the network's security and growth, all while earning substantial rewards. This incentivizes early participation and fosters a robust staking community.**
- **Year 2: 12.5% Allocation (17,500,000 tokens)** • As the journey progresses, betcat' s commitment to rewarding
  - **its stakers remains unwavering. The second year introduces a continued allocation for staking rewards, albeit at a slightly reduced rate. This sustainable approach ensures that the staking ecosystem flourishes while adapting to the evolving dynamics of the crypto landscape.**
- **Seamless Staking Experience**
  - **Engaging with betcat' s staking mechanism is straightforward and user-friendly. Through intuitive interfaces and smart contracts, you can stake your tokens with ease, instantly becoming part of the network's growth story. As you stake, your betcat tokens actively participate in securing the network and validating transactions, earning rewards in return.**
